

Mind Mapping Tool

Use the Mind-Mapping tool to come up with different ways to approach a problem, as well as different ways to address it.

1. Write the community issue in the middle of the paper or anywhere that works for you.
2. Think about what some of the causes of this issue could be.
3. Now, try connecting the different causes you come up with to each other and to the main issue. How do the causes connect to each other?
4. Do you see a pattern?
